

360 FENCE

Manufacturing Quality Ornamental Fence Products

APOLLO™
STEEL

360 Fence offers a comprehensive line of Apollo Steel ornamental picket fence systems, providing quality maintenance free "wrought iron" style products.

With 35 years of manufacturing and design experience in metal finished products, our fences are manufactured to exacting standards demanded by today's consumer with attention to detail and workmanship.

Stepping away from traditional production methods, our plant in Tulsa, Oklahoma, utilizes state-of-the-art production processes. Materials are formed, cut and powder coated with techniques capable of meeting precise tolerances, producing exclusive quality results.

Our unique patented Apollo fence design offers strength, protection and an attractive appearance. Features of our custom designed fence include our patented Slide-Lock rail system and a one-of-a-kind pressed point picket. Additionally, unlike many ornamental fences that are welded together, our pickets are fit firmly in place through laser cut rail slots. This design allows each fence panel to follow grades by up to 25%, avoiding stair stepping.

Why choose 360 Fence?

- *Customer oriented design, production and sales*
- *Dedication to quality in every aspect of our business*
- *American Made: Manufactured and assembled in Oklahoma*
